

VS CLT 220

CHLORINE GRANULES

WATERTREATMENT COOLING TOWER

Description

VS-CLT-220 is chlorine based granules, which is in stable form

Chlorine content is about 90%. Non Toxic(Japan).

Specification

Appearance	Powder granules
Chlorine Content	90%

Advantages

- o Very stable at normal temperature.
- o Releases chlorine on contact with water.
- o The chlorine gas release is very gradual it takes about 24 hours for complete release of gas.
- o There is no special dosing arrangement required.
- o Self-life is over one year.
- o Since the doses are very low lot of saving labour & space.
- o Chlorine granules guarantee the chlorine content.
- o Chlorine granules are cheaper as compared to bleaching powder or sodium hypo chlorites.

Application

The products is dosed directly in case of a swimming poll

In case of drinking water the chlorine granules are directly dosed in the Main chemical tank from this main tank then the chlorine solution is dosed gradually in the water stream. The dosing is about 50 gms for 50 M³

Handling

In Case of eye contact wash eyes with lots of water immediately and give medical attention.
