Available Bromine 64.73% available Chlorine 28.72%. Non Toxic(USA).

Specification

Appearance	Tablets
Bromine Content	64.73%
Chlorine Content	28.72%

Advantages

- o Very stable at normal temperature.
- o Releases chlorine on contact with water.
- o The Bromine/chlorine gas release is very gradual it takes about 24 hours for complete release of gas.
- o There is no special dosing arrangement required.
- o Self-life is over one year.
- o Since the doses are very low lot of saving labour & space.
- o Bromine/Chlorine granules guarantee the Bromine/ chlorine content.
- o Bromine/Chlorine granules are cheaper as compared to bleaching powder or sodium hypo chlorites.

Application

The products is dosed directly in case of a swimming pool

In case of drinking water the Bromine/chlorine granules are directly dosed in the Main chemical tank from this main tank then the chlorine solution is dosed gradually in the water stream.

The dosing is about 20 gms tablet in 500 liter water

Handling

In Case of eye contact wash eyes with lots of water immediately and give medical attention.
