

VS FIN KLEANER

ALUMINUM FIN AIR COOLER CLEANER

WATERTREATMENT CLEANING

Description

VS-FIN-KLEANER is Phosphate base, which does not any on effect the Aluminum alloy fins. It removes the oxidation from the fins there by increasing the heat transfer area, without damaging the fins.

Specification

Colour	Pink
pH	Acidic
Base	Phospate
Specific gravity	1.1 +/- 0.05

Application

The AHU /fins are sprayed with water initially to wet them after this VS-FIN-KLEANER is diluted with water depending on the accumulation on the coils normally 4 to 5 parts of water, with the help of a pump is sprayed on the coil after about 30 minutes the coils are washed with water, The pink colour will change to yellow this is a indication that the product is exhausted.

Cleaning Air Cooler of Power Generators

Blank the connection of air cooler of power generator, fill the air cooler with diluted VS-FIN-CLEANER, 4 to 5 time with water after about 30 minutes when the pink colour becomes yellow drain the solution and flush with fresh water and take into service.

Advantages

- Increase the efficiency of the equipment.
- Cleans the fins very effectively, removes oxidation without damaging the film.
- Decrease the load on the machine.
- Easy to handle and monitor.
- Biodegradable, environmentally friendly.

Handling

It is advisable to handle the chemical with rubber gloves, in case of eye contact wash with lot of water and immediately offer medical aid.

Packing

20/50 liters HDPE carboy
